

Product description: Mouth and Nose mask for hearing disabled people

- 100% eco Tex 100 Cotton (1 Layer), chemically prepared
- Outside: Techmed Fleece, 80% Polyester, 20% Viscose (toxicological harmless, free of latex. No use of optical brightener.)
- Viewing Window made of Polycarbonate
- Ties around the head or rubber band.
- Nose bridge for additional rigidity
- Special sizes for Kids and Teenagers available
- 100% sustainably produced in Germany
- No Certification (medically or otherwise)
- No product liability by Blusenkontor GmbH
- Non-returnable product

The Mouth and Nose Mask is equipped with two ties, which will be tied together behind the head. The Mask is very comfortable due to the use of textile instead of fleece on the inside. The outside is made of "Techmed-Fleece", the inside is made out of 100% eco Tex100 Cotton, which is chemically prepared (toxicologically harmless). The viewing window around the mouth is made out of Polycarbonate.

The Mouth and Nose mask can be handwashed or cleaned with disinfectant (max. 60 degree Celsius). We do not suggest washing the mask in a washing machine, because the polycarbonate viewing window could be blurred (the usability is not impaired). The Mask can be used up to, but not limited to 40 times. It should not be ironed or dry cleaned.
